

Your global partner for high-performance chemicals

The products you need with a can-do attitude you'll love.

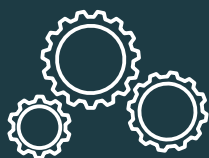

Attention, expertise and innovative solutions

GEO's Paints & Coatings Division helps formulators develop new products and solutions across a wide variety of industries. We not only deliver specialty monomers and polymers on a global scale, but we combine our practical capability with a more personal level of service and attention.

Working with us, you get an active, engaged partner. We'll get to know you and the challenges you're facing, then help you find the best possible answer. We'll put our expertise, flexibility and innovation to work where it creates value for your organisation.

A team that's big enough to deliver but small enough to care. A source of technical expertise that's friendly and approachable. With our dedicated Research & Development team, versatile pilot plant facility, and proven manufacturing capability, we'll help you find - or create - the right chemical for the job.

It's not just delivering chemicals, solutions and formulations. It's forming strong relationships that deliver real results.

Lubricants

A comprehensive range of PAG base stocks and fully-formulated lubricants, all designed with a focus on quality and performance.

Chemical Intermediates

Specialty monomers and polyols for resin formulators from our market-leading brands including Bisomer®, DMPA® and TRIMET®.

Contact Lens Materials

High quality monomers, polymers and tints for the silicone hydrogel and traditional soft contact lens industry.

Lubricants

High-performance lubricants and the highest levels of service

With GEO, you get a complete range of high-performance PAG based lubricants that covers all areas of industry. From base fluids to fully formulated lubricants, every one of our products is developed with uncompromising attention to detail – and we take the same approach to our customer relationships.

As your partner, we'll take the time to understand your industrial applications and the outcomes you need, from improved efficiency to frustration-free production. Then, we'll combine our technical expertise with knowledge of your business to find the perfect fit.

Our products

Polyalkylene Glycols (PAGs)

- **Base fluids**
 - Water Soluble
 - Water Insoluble
 - Oil Soluble (OSP)
- **Fully formulated**
 - Industrial gear lubricants
 - Refrigeration lubricants
 - Hydraulic fluids
 - Brake coating fluids
 - Compressor lubricants
 - Heat transfer fluids
 - Quenchants

An expert partner

Whatever you need, we're here to help. From the intricacies of lubricant formulations to the development of bespoke basestocks, our expertise is your expertise.

A can-do attitude

We combine proven capability with a flexible approach. From the smallest order to the biggest, our processes are designed to scale with your needs, your challenges, and your applications.

Always innovating

We know small changes can make a big difference in R&D and service alike. So we're always innovating to deliver the highest-quality products and the most productive relationships.

Chemical Intermediates

A more personal approach for your polymer synthesis

At GEO, we believe a greater level of understanding means a greater level of service. That's why our comprehensive chemicals range is designed around your specific needs and challenges, from water based automotive coatings to low VOC composites.

Our established processes, product innovation and agile UK and US manufacturing locations mean that we thrive in the small details. With GEO, you don't just get market-leading products like Bisomer[®] Specialty Monomers, DMPA[®] and TRIMET[®] TME.

You get a close relationship, a can-do attitude and our full attention, whatever the size of your order.

Our products

- Hydroxy Methacrylates
 - HEMA, HPMA
- Polyether Methacrylates
- MPEG Methacrylates
- Mono-functional Methacrylates
 - LMA, BZMA,
- Di-functional Methacrylates
 - TEGDMA, PEGDMA, BDDMA
- DMPA[®] – Dimethylol Propionic Acid
- TME – Trimethylolethane
- Polyether based Foam Control Additives
- Allyl functional Polyethers
- Specialty Polyethers and Polyesters

A personal service

Our people are knowledgeable, committed and passionate about exceeding your expectations - because we take the time to understand your applications, we can recommend the ideal solution.

Established facilities

Our proven processes and manufacturing facilities enable us to deliver at scale all around the world. Whatever you need – and wherever you need it – we're here to help.

Practical innovation

We're always looking for new ways to meet your needs. By spending time getting to know your organisation, our innovation is always driven by you – so new products, improvements and ideas deliver real value

Contact Lens Materials

High Purity chemicals backed by technical expertise and quality assurance

We are true technical experts in the development of monomers, polymers and tints for the contact lens industry. With a proven track record of 20 years supplying the industry, our commitment to the future was demonstrated by our recent investment in a state-of-the-art manufacturing facility for the production of silanes and silicones. Our scalable production means we can handle the smallest and biggest orders alike.

Our world class R&D and manufacturing understand the unique challenges you face – and how to overcome them.

Whether you are looking for a new supplier, scale-up of your own laboratory process, or the (co-)development of a new product, our team will work with you to understand your requirements and to develop the best solution to meet your needs.

All delivered with the stringent quality standards and reproducibility that the industry demands.

Our products

- High Purity HEMA
- Silicone monomers and macromers
- High Purity Acrylates
- High Purity Methacrylates
- Proprietary tinting system
- Bespoke materials
- Ultrafiltration

A trusting partnership

We build positive relationships with clients large and small, sharing the benefit of our specialist contact lens expertise while safeguarding your interests through confidentiality.

Investing in innovation

We've invested in R&D and state of the art manufacturing facilities so that we can work with our customers to develop the next generation of raw materials for silicone hydrogel contact lenses and polymer coatings.

20+ years experience

We've been supplying the Contact lens industry for over two decades, and with our new state-of-the-art manufacturing facility, we are well placed to serve it for many years to come.

Talk to us about your challenges and see
how we can overcome them together.
